PROFESSIONAL SUMMARY

Motivated and dedicated Computer Science student with strong problem-solving skills and hands-on experience in machine learning, deep learning, and software development. Skilled in Python, databases, and creative design, with a passion for building efficient, real-world applications and contributing to collaborative teams.

EDUCATION

B.E. in Computer Science and Engineering

K. Ramakrishnan College of Engineering

2024 – 2027

Diploma in Computer Science and Engineering

Government Polytechnic College

2021 – 2024

PROJECT EXPERIENCE

AntiMule Bank

- End-to-end Machine Learning pipeline for money mule detection, featuring automated model training and a high-performance FastAPI inference engine

Object Detection using Deep Learning

- Developed object detection models using CNN and pre-trained deep learning architectures.

AI-Enabled Smart Pest Control System

- AI/IoT-based pest detection and precision pesticide spraying using YOLOv11, ConvNeXt, and smart sensors.

Mini Projects in Machine Learning

- Implemented classification, regression, and clustering algorithms using Scikit-learn.

Insurance Management System

- Built a desktop application using Python (Tkinter + SQLite) for managing clients and policies.

Pharmacy Management System

- Developed an inventory and employee management system using Tkinter and SQLite.

Digital Designing Studio (NoSQL Project)

- Designed a creative project management system using MongoDB for efficient data handling.

Pitch Perfect

- Serving active users with real-time turf slot booking, live slot availability, and secure payment integration.

BusMate

- Smart bus seat booking system providing real-time seat availability, route visualization, and booking system.

Fraud Detection

- Fraud Detection system developed using R programming and Machine Learning techniques

LANGUAGES

- Tamil (Native)
- English (Fluent)

SKILLS

Programming Languages

Python, C, Java, HTML, JavaScript, TypeScript, SQL

Machine Learning & Deep Learning

CNN, Scikit-learn

Database Management

SQLite, Mysql, MongoDB

Problem Solving and Debugging

Digital Design and Creative Editing

Team Collaboration and Project Coordination

CERTIFICATIONS

Python with AI (Machine Learning & Deep Learning) – 3 Month Course

From Relational Model (SQL) to MongoDB's Document Model – MongoDB 

Skilled in converting SQL to MongoDB

Graphic Design Essentials – Canva Design School

Microsoft Certified: Azure Fundamental 

AWARDS

1st Place – Photography in Founder's day 2025
Inter-college

3rd Place – 11:11 Hackathon (24hrs Hackathon)
Outer-college

Best Student Award (2021 - 2024)
In Diploma

1st Place – Paper Presentation
In Diploma

1st Place – Badminton
Inter-college

INTERNSHIPS & WORKSHOPS

Machine Learning Internship

1 Month

- Hands-on experience in data preprocessing, model training, and evaluation.

Photoshop Junior Designer Internship

Pacific Creation (3 Months)

- Worked on design tasks, client-based projects, and creative evaluations.

Internship – BSNL

25 Days

- Gained practical exposure to communication and networking systems.

IoT Workshop

- Hands-on experience with sensors and IoT-based applications.

All India Workshop on Quantum-Enhanced Generative AI

The Institution of Engineers (India)
